

Philips  
Micro music system

Dock for iPod/iPhone/iPad  
DAB+

DCB2070

## Sound that fits your home

Obsessed with sound

Dock and listen to your iPod/iPhone/iPad, or turn on the radio and get crystal-clear DAB+. This Philips micro system sounds sensational, and offers an added bonus - it looks great in any home, whether wall-mounted or set on a tabletop.

### Enjoy your music from multiple sources

- Play and charge your iPod/iPhone/iPad simultaneously
- DAB and FM compatible for a complete radio experience
- Play MP3/WMA-CD, CD and CD-RW
- USB Direct for MP3/WMA music playback
- MP3 Link for portable music playback
- Radio Data System for station information and data services

### Enrich your sound experience

- Bass Reflex Speaker System delivers a powerful, deeper bass
- Digital Sound Control for optimized music style settings
- Dynamic Bass Boost for deep and dramatic sound
- 20W RMS total output power

### Design that blends into your interior

- Wall-mountable option for flexible placement
- Motorized sliding front door adding style and elegance

**PHILIPS**  
sense and simplicity

# Highlights

## Play & charge iPod/iPhone/iPad

Enjoy your favorite MP3 music while charging your iPod/iPhone/iPad! The dock lets you connect your portable device directly to the Philips system so you can listen to your favorite music in superb sound. It also charges your iPod/iPhone/iPad while it plays so you can enjoy your music and not have to worry about your portable player battery running out. The system automatically charges your portable device while it is docked.

## DAB and FM compatible

DAB (Digital Audio Broadcasting) digital radio is, on top of FM analog transmission, a new way of broadcasting radio via a network of terrestrial transmitters. It provides listeners with more choices and information delivered in clear, crackle-free sound quality. The technology allows the receiver to lock on to the strongest signal it can find. With DAB digital stations there are no frequencies to remember, and sets are tuned by station name, so there is no returning on the move.

## USB Direct

With the USB Direct mode, you can simply select the music on a USB device and playback all your content. All you have to do is plug in your USB device to playback music or export content from the device.

## MP3 Link

The MP3 link connectivity allows direct playback of MP3 content from portable media players. Besides the benefit of enjoying your favorite music in the superior sound quality delivered by the audio system, the MP3 link is also extremely convenient as all you have to do is to plug your portable MP3 player to the audio system.

## Wall-mountable

The perfect combination of a slim and versatile design, your Philips audio system is cleverly

designed to blend into your living space. The base of the audio system is a stand so the system can sit securely and nicely on any shelf or cabinet. When wall mounted you have all the same flexibility of the freestanding stand.

## Radio Data System (RDS)

The Radio Data System (RDS) lets you tune into radio stations without having to remember the frequencies. In standard mode, RDS displays the station name instead of the transmission frequency, facilitating quick and easy tuning. RDS also allows stations to send text messages such as news and station information directly to the radio display. Commonly used in Europe, RDS text is sent out on the same frequency the radio station broadcasts on. You can choose either the basic RDS display (station name) or subscribe to additional text-based services.

## Bass Reflex Speaker System

Bass Reflex Speaker System delivers a deep bass experience from a compact loudspeaker box system. It differs from a conventional loudspeaker box system in the addition of a bass pipe that is acoustically aligned to the woofer to optimize the low frequency roll-off of the system. The result is deeper controlled bass and lower distortion. The system works by resonating the air mass in the bass pipe to vibrate like a conventional woofer. Combined with the response of the woofer, the system extends the overall low frequency sounds to create a whole new dimension of deep bass.

# Specifications

## Sound

- Output power: 2 x 10 W RMS
- Sound enhancement: digital sound control, Dynamic Bass Boost
- Volume control: up/down

## Loudspeakers

- No. of built-in speakers: 2
- Speaker drivers: 2.75" woofer
- Speaker types: bass reflex speaker system

## Audio playback

- Disc playback modes: fast forward/backward, next/previous track search, repeat/shuffle/program
- Playback media: CD, CD-R/RW, MP3-CD, USB flash drive, WMA-CD
- USB Direct playback modes: fast backward/fast forward, play/pause, previous/next, repeat, shuffle, stop
- Docking playback modes: fast forward and backward, menu, up and down, next and previous track, play and pause
