

## Changing Contract Supplier names in GSRS

---

---

### **Important Info:**

In order to enable the creation of one view on suppliers, Philips is aligning contract supplier names across different IT applications (GSRS, SCAR, etc.). This is a cross sector effort.

As a consequence CTR suppliers names (CTR= Contract Supplier) may change in the near future.

In most cases the name still will be recognizable. However, in those cases where users (both Philips and Supplier) are not able to retrieve supplier information, supplier users can contact their Philips Supplier Account Manager to get changed supplier names.

The Philips Supplier Account Manager should contact their sector GSRS representative if they have any questions.

Philips users can consult the VPT (Vendor Parentage Too) to find the correct changed supplier name.
