Complete your Enterprise Imaging strategy with

IntelliSpace Image Capture

Providing you with the images you need to make informed patient decisions

Is your Enterprise Imaging strategy **incomplete**?

Intuitive

Complete the imaging picture with IntelliSpace Image Capture

Designed to integrate seamlessly into your workflow, **IntelliSpace Image Capture** is an intuitive application that rapidly places images right where they belong.

- **Capture sources of non-ordered imaging/data into your archive**
- **Move images to where they need to be**
- **Integrate images into your existing archives seamlessly**
- **Enable easy access to image data through patient records in the EHR**

Quick

Rapidly gathers every image you need

IntelliSpace Image Capture works in time with your needs. Move images in seconds from a variety of point-of-care devices to your organization's archive. Upload images in seconds from other media to the archive **quickly and easily**—without manual entry. Images are linked to the patient record in the EHR. And it all happens smoothly within existing workflows.

Multiple departments	Multiple devices	Multiple data sources
Emergency department	Mobile ultrasound units	Personal smartphones and tablets
Post-operative care	Endoscopy devices	CDs and other media
Dermatology	Fluoroscopy devices	Department archives
Vascular surgery	Tablets and smartphones	Device storage

Secure

Enabling privacy and security for your Enterprise Imaging strategy

IntelliSpace Image Capture provides protection for point-of-care images—one of the most vulnerable areas of any institution—by facilitating:

- **Compliance with efforts to protect patient privacy**
- **No VPNs (Virtual Private Networks) or logins**
- **No patient data on staff mobile devices**

Partnering with you to help you realize the true promise of Enterprise Imaging

Complete the picture with a strong ROI

A platform-agnostic solution, **IntelliSpace Image Capture** works with Philips IntelliSpace PACS as well as other imaging viewers and other archives. **Intuitive, quick, and secure**, its point-of-care, image-capturing capabilities can help your organization:

- **Facilitate accurate billing**
- **Capture lost revenue by creating orders for non-ordered imaging across your enterprise**
- **Reduce duplicate testing among departments**
- **Reduce the costs and hassle of manual entry errors**

The full imaging picture—on demand

Clinicians can easily and quickly call up side-by-side comparisons of current and prior images and view them with IntelliSpace viewers or other enterprise viewers.
