

Simplifying care, improving lives

Philips health continuum

In order to tackle the fundamental changes in our world and society, Philips takes a holistic approach to health.

We want to cover the full range of consumer and patient needs, from living healthily, to being diagnosed and treated for an illness, to recovery or chronic care at home. We do this by looking across what we call the health continuum.

**When you're sure,
you can reassure**

Decide. Guide. Treat. Confirm.

IGT Devices enables healthcare providers to decide, guide, treat and confirm in one setting – optimizing care, reducing costs and getting cardiac and vascular disease patients back to living the lives they love.

The acquisition of Spectranetics will accelerate the realization of our strategic expansion into therapy devices. The combination of Spectranetics' highly competitive product range and our leading portfolio of interventional imaging systems, devices, software and services will deliver enhanced cardiac and peripheral vascular care for patients.
