

Operation **get fit**

Philips Respironics provides unique mask-fitting options for your veterans. Mask fit-packs contain everything you need to fit veterans the first time and, if needed, down the road for possible refits. Included in your mask fit-pack configuration, you will receive mask headgear, frame and multiple-sized cushions, depending on mask type or product.

Fit-packs help allow for:

- ✔ **One mask shipment** – fit-packs provide headgear, frame and multiple-sized cushions to help reduce redelivery costs and time to activate patient with correct mask fit
- ✔ **Patient ease** – with multiple-sized cushions, patients can size and refit on their own
- ✔ **Sizing and fitting efficiencies** – sizing gauge and fitting instructions in each fit-pack to help patients find the right fit
- ✔ **Troubleshooting efficiencies** – all three cushion types fit on the same frame, so if the patient needs to try a different type of cushion, it is easy to swap cushions. No need to send them or educate them on a new mask.
