

Enhance your Cardiovascular IT solution by upgrading to the latest Philips Cardiovascular Workspace¹ version

Philips Cardiovascular Workspace 7.0

What's new?

- Referral workflow to support cross site collaboration and reporting in finalizing Cardiovascular studies.
- Reference ranges in the Echo Module, that allows clinicians to set normal values for adult Cardiac measurements to help with the interpretation while reporting on a study.
- Flagging of images in the Echo Module, Vascular Ultrasound Module and Patient-centric Workspace, to help clinicians with marking and filtering subsets of images for specific use cases.
- Further enhancement of the Vascular Ultrasound Module with amend capabilities. This allows clinicians to revise and change the information of an original report (anytime, anywhere) leaving an audit trail.²

Clinical benefits

Provides a single point of access to images and information anytime and virtually anywhere¹. Perform comprehensive analysis, quantification and reporting for fast, informed clinical decision making.

Operational benefits

Provides interoperable access to a variety of systems and applications from a single location, allowing you to analyze data to streamline efficiency.

Financial benefits

Decreases deployment costs and time while interfacing to existing systems through zero-footprint technology.

Augmented security

Best-practice industry standards to combat the evolving cyber security threats in Healthcare. Enhanced security and Enterprise protocols. Operating System required: Windows 10 and higher.

¹ Philips Cardiovascular Workspace is the commercial name of the medical device Philips IntelliSpace Cardiovascular.

Note that availability of Philips Cardiovascular Workspace varies per market, please contact your Philips representative for more information.

² It is the user's responsibility to ensure that Philips network performance requirements (such as performance, VPN) for Philips Cardiovascular Workspace are met.
