

PHILIPS

A man with short brown hair is sleeping peacefully on a purple pillow. He is wearing a white Philips CPAP mask over his nose and mouth, secured by a white headband. He is wearing a purple t-shirt. The background is a solid purple color.

Set-up for a better night's sleep

A quick guide to help you choose a
sleep apnoea mask for your patients

Match your patient's needs with the right mask

When it comes to sleep apnoea, the fit of a mask can make or break a good night's sleep. Choosing a suitable CPAP Mask is an important part of CPAP therapy acceptance and adherence.¹

Philips is committed to helping you easily find the right mask for your patients, so they can sleep better. Because that's what matters most.

How to use

Review the following characteristics with your patient, and then discuss the corresponding mask guidance. We recommend talking them through options, such as the different tube connections and mask types, so they are aware of the range of styles available.

Get to know your Philips mask options

DreamWear – Nasal or Silicone Pillows Cushions

- Designed for your patients' comfort^{3,4,5}
- The DreamWear mask with Nasal Cushion is our most minimal design – cushion rests under your nose, not on it.⁶
- The innovative Silicone Pillows design causes less redness, discomfort and irritation on the face, nose and nostrils.⁵

DreamWear – Full Face

- Designed to prevent red marks and discomfort on the nose bridge.⁵
- Magnetic clips for quick assembly and release.*

Pico – Nasal

- Minimal contact nasal mask that is lightweight and small.
- Pico offers simplicity, comfort and seal with the freedom to watch TV or read while wearing it.⁸

Amara View – Full Face

- Innovative tube in front design offers an open field of vision and helps prevent red marks, discomfort or irritation on the nose bridge.⁷
- One frame for three cushion sizes (S,M,L).

FitLife – Total Full Face

- Unrestricted view.
- Large surface area.
