## Adapter CANbus

Some car models present particular challenges for LED-based retrofit lamps.

When upgrading your car with LED retrofit bulbs, a few challenges may occur such as an error message on the dashboard, a flickering, or a dimming effect. These error messages don't mean the LED bulb itself is faulty.

Therefore, we have developed smart solutions to overcome those challenges.

Unique Philips CANbus adapters ensure the vehicle's lighting systems function smoothly, for a reliable electrical performance over time.

## Adapter rings

Almost every car model has a different type of socket in which halogen bulbs are secured. When replacing your halogen bulbs with LED lighting, you may need a connector ring to secure the LED bulbs inside the headlamp. **Every Philips HL [≈H7] upgrade is supplied with a standard center ring.** If another type of adapter ring is needed, you can find the concerning ring type mentioned in the Philips application list.

Please contact your nearest Philips dealer to buy the right adapter ring fitting your car model, or contact our Philips Consumer Care.
