

## How to choose the right breast pump

When women are committed to breastfeeding, it's good to know which pump will suit her needs best

## Quality pumps that satisfy the high expectations of moms and midwives<sup>1</sup>

Proven clinically and in everyday use, Philips Avent's lightweight pumps use Natural Motion Technology to comfortably stimulate nipples by combining gentle massage with ideal suction levels. For even more ease-of-use and comfort, our soft, silicone cushion is designed to adapt to 99.98% of nipple sizes. And with sound levels are just 50dB – as quiet as a peaceful office or home – it's no wonder our pumps scored 97% in overall effectiveness with lactating moms.<sup>2</sup>
