Halitosis

At-a-glance:
**Achieving
fresh breath**

Bad breath explained

Up to 80% of adults have had halitosis (bad breath), but may not have known it. 90% of bad breath originates in the mouth, and the majority of it can be traced to the coating on the tongue's surface.

Common causes include:

Cavities

Poor gum health

Tongue coating

Other causes may include:

Smoking

Certain foods (e.g. garlic, onion, cabbage)

Certain drinks (e.g. coffee, alcohol)

Certain diets (e.g. fasting, low-carb diet)

Systemic conditions (e.g. liver or kidney disease, gastrointestinal reflux or diabetes)

Ask your dental professional if you have halitosis

BreathRx and TongueCare+: A powerful combination

Philips Sonicare pairs sonic technology with the antibacterial strength of BreathRx tongue spray and mouth rinse.

TongueCare+ has flexible rubber MicroBristles that conform to the surface of the tongue, extending deep to reach bacteria

Sonic vibrations break up bacteria and drive mouth rinse deeper into the grooves of the tongue

BreathRx mouth rinse eliminates bad breath-causing bacteria and neutralizes odors for instantly fresher breath

Small steps with a big impact

The best way to fight bad breath is to combine a mechanical and chemical tongue cleaning method. Follow this three-step system for fresher breath.

Spray

Spray your tongue with BreathRx tongue spray to kill bacteria and neutralize odors.

Scrape

Use a Philips Sonicare TongueCare+ brush head or tongue cleaner to remove odor-causing bacteria from the tongue.

Rinse

Sweep away any remaining bacteria for all-day fresh breath.
