

Improving people's lives

Philips, together with its partners, are delivering on our commitments to the United Nation's Sustainable Development Goals

As a leading health technology company focused on improving people's lives through meaningful innovation, it's only natural that everything we do is aligned with the Sustainable Development Goals (SDG).

We aim to improve the lives of **3 billion people** a year by 2025 and have **95% of Philips revenue** linked to the SDGs.

We will achieve this by continuing to focus on:

SDG 3 Good health and well being

Ensure healthy lives and promote well-being for all at all ages

Nearly **3 million babies** die every year in their first month of life¹

Each year **20 million women** experience pregnancy-related illness²

More than **38 million people** die each year from Non-Communicable Diseases³

How Philips contributes

We need to transform our healthcare systems, in both mature and emerging economies, to co-create a healthier future for all.

Treatment of children **quadrupled** at our Kiambu County Community Health Center in Kenya in 18 months⁴

Threefold increase in early detection of high risk pregnancy in an Indonesian pilot project with our Mobile Obstetrics Monitoring solution⁵

1.5 million Philips automated external defibrillators have now been sold globally

Some of our partnerships to achieve SDG3

Committed to the **health of women and children**

Philips is committed to the UN's Every Woman, Every Child global movement by pledging to improve the lives of 100 million women and children by 2025

Innovating for Impact

the Philips Foundation has established shared-value partnerships and is innovating for vulnerable communities around the world

Empowering heart health

Philips is partnering with the World Heart Federation to help people manage their heart health as part of a bid to reduce the world's leading cause of deaths

SDG 12 Responsible consumption and production

Ensure sustainable consumption and production patterns

Over US \$1 trillion a year could be generated by 2025 for the global economy through Circular Economy approaches⁶

There will be a **55% increase** of global energy demand by 2030 putting pressure on achieving global carbon reduction targets⁷

20% of extracted materials are wasted globally per year (12bn tonnes)⁸

How Philips contributes

Philips believes that new business models can deliver excellent value to customers while radically reducing resource consumption.

54% of total company revenue in 2015 was made up of products that apply ecodesign and circular economy principles⁹

We reduced the carbon emissions of our operations by **40% in 2015** compared to 2007⁹

740 tons of refurbished medical imaging systems returned to the market in 2015⁹

Some of our partnerships to achieve SDG12

We apply **circular economy**

design and business models as we innovate with our customers, such as the Westchester Medical Center Health Network (US), on health solutions as well as in delivering them in the most resource efficient way¹⁰

We aim to be **carbon neutral**

in our operations by 2020. Maersk Line, is our partner in ensuring that we are able to cut 20% of CO₂ emissions for every Philips container moved¹¹

Sustainable supply chain

Philips is a strategic partner of the European Partnership for Responsible Minerals, a multi-stakeholder initiative designed to stimulate responsible mineral trade¹²
