

# The hospital of the future puts people first

Jeroen Tas, Chief Innovation & Strategy Officer

HLTH 2019

innovation  you

# Powerful trends are shaping the industry

**Many countries are facing similar healthcare challenges**

**The days of the traditional hospital as we know it are numbered**

**Insufficient access to quality care**

**Escalating healthcare costs**

**Staff shortages leading to burnout**

**New generation of providers (IDNs, retailers, payers, start-ups)**

**New generation of health-savvy consumers**

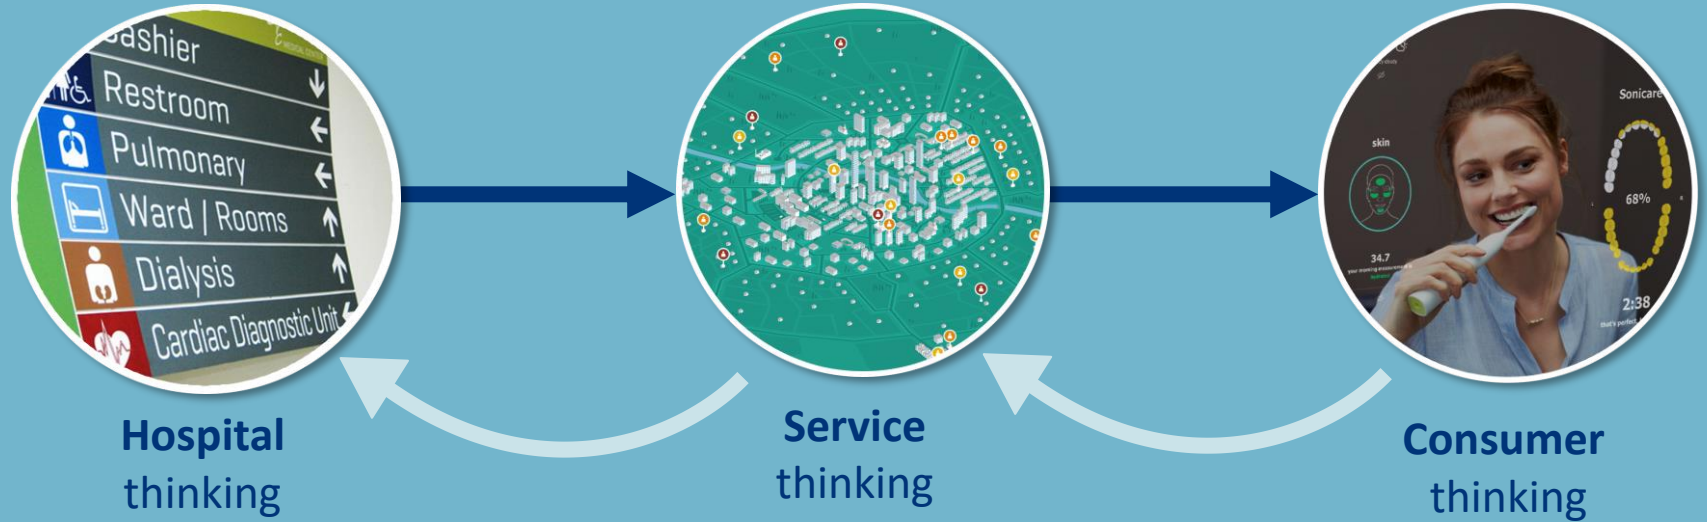

**New generation of tech-savvy health professionals**

**What consumers and care professionals want is not what they get.**

# Digital is driving the transformation

# The paradigm shift ...

**Re-thinking healthcare experiences outside-in**

# The quadruple aim to guide healthcare solutions

**Better  
health outcomes**

**Lower  
cost of care**

**Improved  
patient experience**

**Improved  
staff experience**

Experiences that  
adapt to the patient  
based on deep  
understanding of  
that patient

*Resulting in relaxed  
patients, first-time-right  
procedures and improved  
outcomes.*

*Learning from every  
patient.*

Experiences that adapt  
to the professional based  
on the expertise of that  
professional

*Resulting in integrated  
workflows providing a  
seamless experience with  
improved outcomes.*

*Learning from  
every diagnosis.*

Experiences that  
adapt to the  
professional and  
the patient

*Natural authentic  
experience allowing full  
focus on the patient, all  
information at your  
fingertips at all times.*

*Learning from every  
procedure.*

# The hospital of the future is a network

## Empowering consumers

*Helping consumers and their caregivers including family and community with access to always-on digital and human support.*

Hi Alex, how can I help?

I've got a really bad headache and I don't know what to do...

No problem, let me ask you a few questions

Supporting  
virtual care

*Connecting care providers to  
enable clinical collaboration,  
remote consultation, training  
and AI-supported access to  
care.*

## Expanding access to critical care

*Remote monitoring  
allows 24/7 quality care  
in a more efficient  
model.*

Cath lab  
procedures  
outside the  
hospital

*High-tech minimally invasive  
procedures are increasingly performed  
in “office-based labs” that are located  
in communities close to where people  
live and work.*

# Key takeaways

**Digital health tech will enable longer and healthier lives**

in a healthcare system that pursues better health outcomes for all

**Precise, personal,  
predictive, pro-active**

**24/7, holistic and  
coordinated**

**Actionable insights  
in health drivers**
