Healthcare hits reset

Priorities shift as healthcare leaders navigate a changed world

Download report

The Future Health Index 2022 is the largest global survey, analyzing the top priorities and concerns of almost 3,000 healthcare leaders in 15 countries, including around 150 radiology specialists

Radiology leaders are reassessing their priorities as they navigate a new world

Emerging from the pandemic, radiology leaders identify three key challenges for 2022 and beyond.

Driving productivity in the face of increased demand

Increasing the quality of care and driving department efficiency are top of mind for radiology leaders. Addressing these should help deliver another top priority: staff satisfaction and retention.

Top priorities for radiology leaders

Radiology leaders are embracing predictive analytics

 believe predictive analytics can have a positive impact on health outcomes

Radiologists are early adopters of predictive analytics

Radiology leaders are ahead of colleagues in other specialties when it comes to adoption of predictive analytics. They are also overwhelmingly positive about its potential benefits on patient care and staff experience.

Trust in insights

While radiology leaders have high levels of trust in predictive analytics, improved data privacy and security protocols would increase trust even further.

Accelerated by the pandemic, the healthcare sector has undergone a dramatic transformation

In response, leaders have radically shifted their priorities. The report emphasizes three imperatives for healthcare leaders that are key to resolving these challenges:

The **Future Health Index** is commissioned by Philips

The Future Health Index 2022 report examines the experiences of almost 3,000 healthcare leaders and their expectations for the future. The research for the Future Health
