What Personal Data are collected; Why are these Personal Data collected? With whom are Personal Data shared?; How long will the Personal Data be kept?

The data was originally collected in the study: “Étude AutoPilot” (performed by the CHU Caen Normandie and Philips France Commercial). Only a part of the data is used in this study:

What	Why	Whom	How long
De-identified ultrasound images	Used to develop algorithms to better: image quality pattern recognition measurement calculation and visualization	CHU Caen and Philips France Commercial SAS and Philips GmbH	Periodic review (<5 years) if the data is still useful. Deletion of data if it is no longer useful. Max 20 years

To protect your privacy, all directly identifying data (example: name, medical record number, contact details) will be separated from the research data (such as measurement data) and replaced by a participant code. On all study-specific documents, other than the signed consent form, you will be referred to by a participant code, not by name. Philips will only receive the research data.

Your participation in and any information you provide in relation to this initiative is confidential. Records identifying you will be kept confidential to the extent allowed by the law. Results may be published without disclosing your identity

In addition to the information above, the following people might have access to records directly identifying you:

- Individuals performing the study;
- Individuals who have a business need to access your Personal Data, such as the personnel tasked with storing the signature forms;

What is the purpose and legal basis of the processing?

Based on your consent, Philips France Commercial SAS, processes your personal data for the following purposes:

- Test if it is possible to guide a non-expert user to make ultrasound images that are useful for an expert. This includes research involving ultrasound volumes and sections acquired during

ultrasound scanning to develop algorithms for image quality improvement, pattern recognition, measurement calculation and visualization. These volumes and sections will be de-identified and will not be used for diagnostic purposes and will not be used for diagnostic purposes.

Based on the legitimate interest to do scientific research, Philips GmbH processes your data to develop better algorithms as described in above table. Philips GmbH will publish about this scientific research.

Insofar as we have a legitimate interest, we may process your data for the following purposes:

- To aggregate and/or anonymize Personal Data, so that it will no longer be considered Personal Data. We can do so to generate other data for our use, which we may use and disclose for any purpose;
- For fraud and security monitoring purposes, for example, to detect and prevent cyberattacks or attempts to commit identity theft;
- To enforce our terms and conditions and to protect our rights, privacy, safety, or property of our affiliates, you, or others;

To comply with legal obligations Philips may process or disclose your data for the following purposes:

- For audits, to verify that our internal processes function as intended and are compliant with legal, regulatory, or contractual requirements;
- To comply with applicable law - this can include laws outside of your country of residence;
- To respond to requests from public and government authorities, these can include authorities outside your country of residence;
- To cooperate with law enforcement, for example law enforcement requests and orders;
- We may also process or disclose your data to protect your or someone else's vital interests.

With whom do we share your Personal Data?

We may disclose your Personal Data:

- To the parties specific to the initiative you take part in, as set out on page 1;
- Our affiliates or subsidiaries for the purposes in this privacy notice. Affiliates all process data under the same set of Binding Corporate Rules (www.philips.com/privacy);
